

Moulding Success

A new product generation: Increased thermal conductivity

The newly developed products show the following advantages:

- Isotropic heat dissipation
- Unproblematic processing
- Good price-/performance ratio

*Thermal conductivity up to 2,4 W/mK
even in thin layers!*

We would welcome the opportunity to present these results in more detail to you in person. Please contact our Sales Manager for further information at thomas.moser@duresco.ch or Tel. +41 61 726 62 14
