Success Story: IMI Buschjost solenoid for AdBlue Injection

Better than ever before

What was the project goal?

To produce a solenoid for the injection of AdBlue in automotive applications.

What was the challenge?

AdBlue is a relatively aggressive substance and attacks many materials.

How did we solve this?

Due to the constructive cooperation with the customer and the positive processing and end properties of our products, it was possible to develop a functioning product within a short timeframe.

What did IMI Buschjost gain from this?

A coil with good chemical and crack resistance. The high product requirements for this innovative and environmentally friendly application were fulfilled.

Product:

Duresco NU 461 R

Testimonial

„We value Duresco as an innovation partner, with whom we can communicate openly and informatively – including the area of technical support.“

moulding success

Since 2003, Duresco has been developing and producing high performance thermosetting materials.

Our customers cover a range of industries and have one thing in common: They are developing products of the future for their individual markets.

We are pleased to support our customers to meet these goals, through our focus on innovation and high levels of motivation and commitment. We can achieve this not only through the development, but also the production of our Epoxy Moulding Compounds.

Our success stories provide a small insight into the possibilities.
